

COVID-19 UPDATE

OCTOBER 13, 2021

To our families, friends, and residents:

Thank you for your continued patience, understanding, and prayers. Our staff has been working diligently to ensure the safety and well-being of our residents. While the number of COVID-19 cases in Blair County rose significantly in September, we are managing any potential exposures and mitigating risk within our community. The facility continues to work with The Department of Health at both the local and state level. Furthermore, we continue to partner with individuals affiliated with the Regional Congregate Care Assistance Teams to mitigate potential exposures and safeguard our residents. New COVID-19 regulations outline several approaches for COVID outbreaks, including contact tracing versus a broad-based approach, and we are working with officials to ensure we are utilizing the best practices available. Visitations inside the facility, including Compassionate Care visits, remain available. Visitation arrangements can be made through the Activities Department by contacting Mike Lightner at 814-793-2104 x2212.

Information regarding the Pfizer booster will soon be available and we will update you with any changes regarding the booster shot. We hope to offer the booster as an additional layer of protection in the near future. Any unvaccinated individuals who wish to start the vaccination process should see the nursing department staff for further direction. We hope this update provides clarity on our mitigation strategies, visitation status, and vaccine booster status. For any questions or concerns, please contact us at 814-793-2104. We will continue to update you with any significant changes. Thank you for your support; and God Bless.

Sincerely,

Corey Jones
